Christmas and New Year on the Bal-timore and Ohio.

The Baltimore and Ohio, as usual, will extend holiday greetings in the shape of round-trip tickels at greatly reduced rates over their entire system. The low rates go into effect at all stations on the main line and branches east of the Ohio river, including the Pittsburg division, on the 23d, and those who go to take Christmas turkey with friends may remain until after New Year and enjoy themselves to the utmost. If they do not want to go on that date they can purchase tickets on the 24th, 25th, 30th, and 31st of December, also Jan. 1. These tickets are all good to return until Jan. 5 inclusive. The plan adopted by this company of issuing round-trip tickets has been in vogue for several years, and has become not only popular with their patrons but quite successful in a pecuniary point of view. Damages Wanted for Injuries. A declaration was filed on the law side of the court yesterday by Jane C. Burch against the Inland and Scaboard Coasting against the Inland and Scaboard Coasting company, claiming \$5,000. It seems that the plaintiff on the 27th of last November was a passenger on the steamer John W. Thompson from Chaptice wharf, St. Mary's county, Md., to this city. On the same boat was a cow being brought up as freight, and during the trip the plaintiff alleges that she received severe injuries from the animal, which had been insecurely fastened, was prevented from attending to her business, and put to considerable expense, for which she is entitled to recover.

DR. C. L. ANDERSON,

601 THIRTEENTH STREET, CORNER F STREET,

Formerly Expert of the SHEFFIELD TOOTH CROWN COMPANY, New York City, has located at 601 THIRTHENTH STREET, CORNER F. Makes a Specialty of Tooth Crowns and Artificial Teeth Without Plates.

This system entirely obviates the necessity of axtracting teeth, does away with artificial teeth, prevents the suffering caused by docay of the teeth and consequent extraction of the roots (producing a change in the expression of the sace and mouth), and avoidable pain and excessive annoyance of a plate.

By this method roots and badly decayed teeth, which are firm in position, may be restored to ricel usefulness and beauty, nectorming the office a metication like the natural teeth.

GENERAL DENTISTEY IN ALL ITS BRANCHES.
